Full Stack Developer – Telecommunications Engineer

PROFILE

I am a Full Stack Developer with a background in telecommunications engineering and hands-on experience in development projects. My expertise spans HTML, CSS, JavaScript, React.js, Next.js, Redux on the frontend, and Node.js, Express.js, PostgreSQL, MongoDB, Sequelize on the backend. Working within agile teams like Scrum, I've honed soft skills such as technical problem-solving and effective communication. I prioritize efficient delivery and collaborative development in demanding environments.

PROFESSIONAL EXPERIENCE

ABAI

Network Support Engineer | WAN Networks and Telecommunications Equipment Specialist | August 2023 – Present (4 months)

In my current role, I am responsible for efficiently addressing and resolving network failures such as Flex WAN, MacroLAN, router and switch configuration, as well as telecom equipment management. I have solid experience in diagnostics and troubleshooting on a variety of devices, including fiber optic equipment, ADSL, and technologies from leading vendors such as Cisco, Huawei, Nokia and Juniper. My focus is on ensuring operational continuity through agile problem identification and resolution, using tools such as Telnet/SSH and other remote access solutions.

ELETCOL

4 years 9 months

- **Rollout Manager (ROM) | March 2022 – May 2023 (1 year 3 months)**

As Rollout Manager, I successfully led the deployment of the LTE700 project for Claro in Colombia, insured quality and efficiency in time and budget. I supervised multidisciplinary teams, complying with quality and schedule. I preserved fluid communication with Nokia, meeting their expectations. In addition, I optimized the allocation of resources, overcoming challenges with determination to meet deadlines.

- **Technical Project Manager | January 2022 – February 2022 (2 months)**

As leader in the implementation of the LTE700 project for Claro in Colombia, I ensured efficient and successful deployments, maintaining high quality standards and controlling time and budget. I addressed to multidisciplinary teams, guaranteed quality and schedule compliance.

I maintained constant communication with Nokia to meet their needs and expectations.

I coordinated resources, optimized budgets and faced challenges with effective solutions, always prioritizing quality results and established deadlines.

- **Telecommunications Project Coordinator | September 2019 – December 2021 (2 years 4 months)**

As Facilities Coordinator at ELETCOL, I led the implementation of key telecommunications projects, overseeing the installation of more than 150 links, including the first 5G equipment pilot in Colombia. I actively participated in the modernization of Claro's network with 5GDSS and the installation of the LTE700 band under Nokia, improving coverage. My role included team coordination, project management and quality standards assurance, contributing to the success and technological evolution of Claro in Colombia.

- **Facilities Quality Auditor | February 2019 – August 2019 (7 months)**

As an Installation Quality Auditor, I solved technical problems and ensured compliance with standards in radio base installations. I collaborated with multidisciplinary teams to assess the quality of work and used data analysis skills to interpret technical results. I sustained a proactive and customer-oriented attitude when interacting with Nokia representatives and other customers during audits, providing clarity on processes and results.

● **Telecommunications Installation Supervisor | September 2018 – January 2019 (5 months)**

As leader, I coordinated and managed the team of installers in the field, assigning responsibilities and supervising the assembly of telecommunications equipment in the radio bases. I ensured that installations met established standards, providing technical guidance to the team and monitoring progress to meet deadlines. I reported progress and challenges to management, prioritized work safety, solved technical problems and preserved fluid communication between teams.

PROJECTS

Back End Developer – Pura Vida Viajes Premium

Academic Experience. Henry Bootcamp

I spearheaded the development of a groundbreaking web project featuring exclusive travel packages across various countries. Leveraging React, CSS, and HTML for the frontend, and harnessing the power of Node.js paired with MySQL for the backend, our project boasted an interactive interface adorned with captivating animations, significantly enhancing the user journey. My pivotal contributions included integrating a robust and secure payment gateway through PayPal, alongside implementing a comprehensive administrative panel based on CRUD operations. This initiative not only highlighted my adeptness with technology but also showcased my ability to seamlessly merge tech prowess with design finesse, culminating in a functional and captivating web experience.

EDUCATION

Full Stack Developer

Henry | Jul 2023 – Nov 2023, Bogota, Colombia

B.S in Telecommunications Engineer

University of Carabobo | 2012 - 2018, Carabobo, Venezuela

SKILLS

Full Stack Web Development: HTML, CSS, JavaScript, React.js, Next.js, Redux, Node.js

Databases: PostgreSQL, MongoDB, Sequelize

Web Application Development: Express.js

Telecommunication Networks: Design, implementation and maintenance

Project Management: Planning and execution

Technical Troubleshooting: Identification and resolution

Teamwork: Effective collaboration

Software: Microsoft Office (Intermediate), Power BI, Power Query

LANGUAGE

English (**B1 Level**), Spanish (**Native**)
